

Retail Flooring Company: Case Study #286

The Challenge:

Ceramic Tile Supply NW came to Net Visibility Group in a somewhat urgent state, with the recent changes to the local economy they needed to shift their business model from commercial to residential fast.

- They had tried a series of different marketing companies and strategies resulting in multiple websites owned by different companies with largely incorrect listing information across the internet.

- Had recently lost largest commercial client and needed to replace the lost revenue as soon as possible.
- Local competitors had long established websites with large internet marketing budgets.

The Plan:

- Find and procure a keyword relevant geo specific web domain that the client would own.
- Design and build a website that was visually appealing, targeted a very specific demographic and was SEO friendly, including URL structure, meta-data, sitemaps and keyword density.
- Undertake keyword research and analysis to identify the top keyword in relation to their industry and geographic location.
- Implement a strategically targeted PPC campaign utilizing our NVG LocalBrand™ service.
- Develop and implement an aggressive link building strategy based on keywords targeted to reach the client's ideal customer.
- Utilizing our proprietary local listing service NVG LocalList™ to clean up their multiple incorrect directory listings.
- Claim and optimize Local business listings in Google, Yahoo and Bing.
- Frequent and proactive optimization monitoring.
